EXPERIENCE

Web Developer 06/2025

bitBirds Solutions Dhaka, Bangladesh

- Engineered and launched 50+ custom WordPress and Laravel websites, cutting average load times by 30% and elevating client SEO rankings.
- Created 30+ custom WordPress plugins and themes, extending platform capabilities with tailored, client-specific functionality.
- Participated in agile cross-functional workflows — sprint planning, code reviews, and QA — to ship responsive solutions on deadline.
- Served as a go-to resource for debugging, performance profiling, and feature scoping.

Freelance Web Developer 08/2018

Fiverr Remote, Worldwide

- Independently deliver end-to-end web solutions — scoping, development, and post-launch support — for clients across 20+ countries.
- Specialize in Magento 2, Shopify, WordPress, and PHP; known for pixel-perfect execution and SEO-conscious architecture.
- Sustained a 5★ rating across 190+ verified reviews, building a loyal base of 170+ repeat and referred clients.
- Foster long-term partnerships through transparent communication, proactive updates, and consistent on-time delivery.

Web Developer 06/2024 – 04/2025

Turning Point Zone Dhaka, Bangladesh

- Architected custom WooCommerce and WordPress stores from scratch, with a focus on speed, accessibility, and conversion optimization.
- Crafted original themes aligned tightly with each brand's visual identity and strategic goals.
- Extended store functionality through bespoke plugin development, reducing reliance on third-party tools.

Chief Technology Officer 01/2020 – 05/2022

Manage My Groceries Canada (Remote)

- Owned the full technology roadmap — infrastructure, team leadership, and software delivery — across a grocery e-commerce platform.
- Streamlined helpdesk and internal tooling, measurably improving support team response times and customer satisfaction.
- Championed engineering best practices: code quality standards, security audits, and performance benchmarking.
- Recruited and mentored junior developers, fostering a culture of ownership and continuous improvement.

SUMMARY

I am a Computer Engineer with over 7 years of experience in web development, specialising in creating high-performance web applications across Shopify, WordPress, and Magento 2. My commitment to clean code and excellence has earned me a strong reputation, supported by a portfolio of over 150 projects delivered globally. I excel in agile environments and am dedicated to achieving measurable results for my clients.

CERTIFICATIONS

Backend

PHP · NodeJS · Ruby on Rails · Laravel

Databases

MySQL · MongoDB

Platforms

Shopify · WordPress · Magento 2

Web Developer 04/2019 – 06/2021

AutoMaximizer Remote

- Built UI/UX-led automotive web experiences — prioritising intuitive navigation, visual clarity, and mobile-first responsiveness.
- Refined layouts, animations, and interactive elements to reinforce brand identity and boost user engagement.
- Coordinated with design and marketing teams to implement new features and maintain peak site performance.

PROJECTS

Shopify Form App

A custom Shopify app built with Laravel that collects customer data, automatically captures location via IP geolocation, creates Shopify customers, and subscribes them to email marketing.

Work Log Generator

An interactive Work Log Generator built with Laravel 12, Tailwind CSS, and JavaScript. Allows users to generate daily work logs, save them, fetch previous day work, and copy styled templates seamlessly via AJAX.

Personal Finance manager

FinanceHub is a secure, modern, and feature-rich personal finance management application built with Laravel 11, Livewire 3, and Tailwind CSS. It is designed to provide users with a premium experience for tracking wealth, automating bills, and achieving financial freedom.

Shopify Chat Widget

A lightweight Shopify chatbot widget named Planty that integrates with OpenAI via a secure Vercel serverless proxy. Planty appears as a floating chat bubble, supports quick replies, reset, auto-scroll, and a custom welcome message—offering customers instant, friendly, AI-powered assistance.

Numerous Wordpress Plugins

Custom wordpress plugins listed below:

Wp-sleek-admin - A sleek, modern WordPress admin theme with light/dark mode and full color customization.

Smart-404-redirect - A lightweight WordPress plugin that intelligently handles 404 errors by redirecting visitors to relevant pages — with support for wildcard URL pattern matching

Custom-form-builder - A lightweight, intuitive WordPress plugin that lets you create and manage custom forms with a simple drag-and-drop interface.

Portable-vc-addons - Portable VC Addons enhances WPBakery Page Builder with custom elements like Post Slider, Single Post, Hover Box, and Custom Table.

Image-slider - Custom wordpress image slider
